

## Quotes by Signed Organizations:

### Renewable Energy Institute

*“We are concerned that the Japanese government seems to be underestimating Asia's significant renewables potential, emphasizing that Asia is “forced to rely on thermal power”, which will likely influence other nations' decarbonization efforts.*

*As a think tank based in Japan, we will collaborate with our regional counterparts to provide data and analysis that will bring more scientific data-driven context to this perspective.”*

Yuri Okubo, Senior Climate Engagement Strategist

### Institute for Essential Services Reform (IESR)

*“Our study indicates that it is more cost effective, reliable and fast to utilize renewable energy coupling with energy storage to meet future energy demand and decarbonize our power system. High share renewable energy in power system generates cheaper electricity for Indonesia consumer compare to power system with fossil fuels generation with CCS/CCUS or ammonia co-firing as advocates by Japan.”*

Fabby Tumiwa, Executive Director

### NEXT group

*“NEXT group is delighted to be part of this coalition of energy transition think tanks. As a think tank based in South Korea, we will share our expertise in data-driven climate policy research and experience in collaborating with various stakeholders, including decision-makers, to strengthen the decarbonization efforts of the Southeast Asian neighbors.”*

Seungwan Kim (Dr.), CEO
